

Venison Sampling

Location: We are collecting samples of venison from deer harvested in and near the City of Parchment and Cooper Township for PFAS analysis.

Collection:

1. Hunt as you normally would.
2. Take precautions when butchering to avoid letting anything that contains PFAS (e.g., parchment paper, water-resistant clothing/shoes, etc.) to touch the meat.
3. Do not rinse. Use a clean cutting board and knife to chop off a 30 to 60 oz piece (egg-sized) of meat that you would typically eat.
4. Seal it in a zip bag (e.g., Ziplock®) and record the harvest date on the bag.
5. Store in your freezer and contact our staff to come pick it up. You can call, text, or email us at 269-281-4005; pfasunitedd@gmail.com.
6. Record the following information for each sample:

Your Name: _____

Date Harvested: _____ Location Harvested: _____

Date Butchered: _____ Location Butchered: _____

Deer Size: _____ Stag or Doe: _____

Notes: _____
